Mr. President—That question does not arise from this.

Work of the Agricultural Inspector in the Vyttila Cocoanut Farm.

232. Mr. A. Narayana Menon.—Will the Government be pleased to state:—

(1) over what area has the above officer jurisdiction;

(2) what are the duties of this officer;

(3) does he submit his daily diaries to the Superintendent of Agriculture; if so, at what intervals;

(4) has he given practical demonstration to the Agriculturists at any time in the last one year; if so, to whom and in which places;

(5) does this officer volunteer his services to the Agriculturists; if so, in how many cases has he volunteered his services and with what results?

Mr. K. Krishna Warriar.—(1) The Agricultural Inspector (at the Vyttila Cocoanut Farm) has jurisdiction over the whole of the Cochin-Kanayannur Taluk. Besides the charge of

LIBRARY ARCHIVES Kerala Legislative Assembly

the Cocoanut Station he is in charge of the Seed and Manure Depots at the Cocoanut Station and at Mulanthuruthy.

(2) The duties of the Inspector are to keep in touch with the agricultural population of the Taluk, to render aid to agricultural Societies and Associations, to popularise new methods of agriculture, to impart agricultural education by means of lectures, demonstrations and other means, to promptly report about and check crop diseases and pests, to advise cattle owners, to adopt up-to-date methods of housing cattle and preserving manures, to report on the out-break of any cattle disease and to carry out such orders as may be issued by the Director of Agriculture from time to time. He is to see to the proper conduct of experiments and other works in the cocoanut station and is in charge of the Depots and Breeding Bulls stationed at the Depots. The work of the Avenue Maistry of the Taluk has also to be supervised by the Inspector.

(3) The diaries are submitted monthly and not daily.

(4) The particulars of demonstrations are given in the statement appended (*Appendix VI*).

(5) Yes. He is at the disposal of the agriculturists who want his services. Their requirements for supply of seeds and seedlings and for advice of planting and cultivation and for manuring are met with as promptly as possible. The ryots' gardens are as often inspected as time permitted to prevent and check pests and diseases. The exact number of cases in which he volunteered his services has not been recorded and so also the results. In general it can be said that there is increased demand for cocoanut seedlings and other fruit tree plants and manures and there are greater number of enquiries regarding the control of pests and diseases on account of propaganda work.

Mr. A. Narayana Menon.—With reference to sub-division (5) it is stated that the exact number of cases has not been recorded and so also the results. Do not the Diaries show this?

Mr. K. Krishna Warriar.—It is not possible to record all the instructions given and also the advice in the diary. Of course the main ones will be recorded, that is all. It is not possible to record all the information given to any person during his tours in a diary. Sometimes the instructions given may have been carried out or may not have been carried out.

LIBRARY ARCHIVES Kerala Legislative Assembly

To go and enquire whether these instructions have been carried out is impossible.

Mr. A. Narayana Menon.—My point is—does not the diary show 'inspected the garden of such and such persons, gave instructions, etc?' Does not the diary show that at least? If it does not show, will the Director of Agriculture be pleased to insist upon the officer to note at least these essential things in the Diary?

Mr. K. Krishna Warriar.— Of course, I shall issue orders to note down in the diary important informations and if anybody has carried out the instructions that also.

Mr. K. M. Ibrahim.—Is this officer doing anything on his own initiative to advise and help the agriculturists apart from the requirements of the people?

Mr. K. Krishna Warriar.—Yes.

Mr. K. M. Ibrahim.—In what way, please?

Mr. K. Krishna Warriar.—He is persuading the ryots to carry on agricultural operations on improved lines and also the introduction of new varieties of plants and other fruits trees.

Dr. A. R. Menon.—Unless the work is recorded in the diary how will the Director be able to know whether he has carried out his work?

Mr. K. Krishna Warriar.—Such important portions of the work will be recorded in the diary. For example I shall cite one here. From the Appendix it will be seen that he advised Thukkalam Kochapilli Chummar Ittoop. He was advised to cultivate grains in his garden and instructions were given by the Inspector.

Mr. President.— So you concede the Hon'ble Member's point that the officer must note his work in the diary?

Dr. A. R. Menon.—What I want to say is that the object of writing the diary is for the superior officer to see whether the subordinate officer is doing his work or not. Let the diary be in such a way that it can be checked by superior officers.

Mr. K. Krishna Warriar.—It is being done.
